Mask/Device Compatibility List

English

This document specifies the masks compatible with ResMed's positive airway pressure devices and the mask setting, if one is required. For full details regarding the correct use of these devices, please refer to the specific User Guides.

Note: Not all products are available in all regions.

1 SmartStop may not operate as described when using this mask with some CPAP or bi-level devices.

2 Accuracy of tidal volume/minute ventilation may reduce using the AirFit P10 mask in bilevel modes (S, T, ST), particularly at higher pressure supports.

3 Excluding PAC and iVAPS modes. Only compatible for pressure range 4 - 25 cm H2O.

4 This combination of mask and device has been determined safe for use based on the evaluation of accuracy of monitoring of pressure, volume, minute ventilation and respiratory rate, and its alarms if applicable. Small variations in performance might be observed, particularly at higher pressure or flow. As per expected clinical practice, the effectiveness of ventilation and alarms should be verified by the clinician.

N/V = The mask has not been validated for this device.
